The citizens were suspicious, however, and only a few of them went to the fire. On the same day some of the robbers went to the house of Wiley Watkins, who lives about six miles from London, and robbed him of \$800 in cash.

An attempt was made to rob Roland Hodge, who lives in the vicinity of the town, but he succeeded in frustrating the thieves and carried his money into town, where he has kept it since. The robbers are fifteen in number, and it is feared an effort will be made to burn and sack the town.

A strong guard is kept every night. Three of the guard gave chase to a suspicious character last night. He was on horseback and ordered to halt several times, but he refused to do so.
